About Ninestar

Founded in 2000, Ninestar has been focusing on inkjet cartridges, toner cartridges and ribbons' development, manufacture and sales for more than 19 years. Headquartered in Zhuhai, Ninestar has established branches, warehouses and logistic platforms in Holland, the USA, Italy, Malaysia and Japan to offer quick local response. Quality products and services are distributed to over 170 countries and reach over 200 million end users. So far, Ninestar holds a total of 4,330 patents worldwide, far more than any other company marketing third-party supplies. Ninestar's products are recognized around the world for their superior performance and reliability.

What are MPS customers' needs?

The popular word “MPS” in print imaging industry, is what we call Managed Print Service. MPS truly achieves “one-stop solutions” for users’ printing requirements. It can realize the combination of customizing “products and services”. The outsourced print service and printer rental we often mentioned actually are parts of MPS.

As the market continues to shift in the direction of services, MPS is continuing to grow. It is a result of more and more enterprises seeking to boost productivity, increase efficiency and reduce costs by implementing MPS. This is also the nature of MPS customers' demand.

What are the features of MPS products?

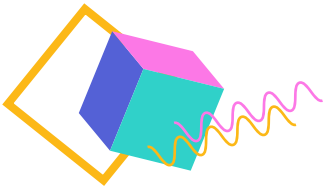

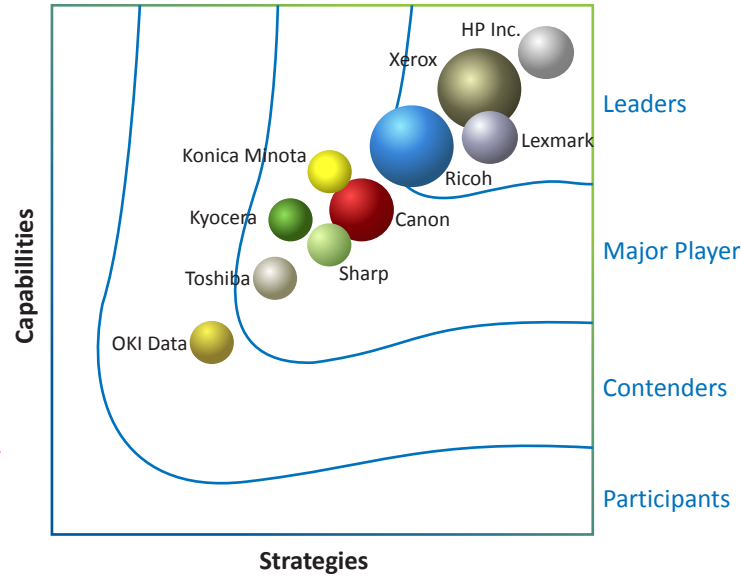

The most common seen MPS equipment are:

- Typical copiers like Canon ImageRUNNER series, Ricoh MP/MP C series, Kyocera Taskalfa series and etc.
- A3 format, single-function copiers with toner kits
- A4 format, over 40 ppm, single-function or multi-function copiers with toner kits

Features of MPS Consumables:

- Compatibility: 100% compatible with OEM toner cartridges and customers' last purchased consumables.
- Color/Image density: MPS customers are enterprises users (especially in CAD /graphic industry) who have a higher demand for printing performance
- Higher page yield brings lower printing cost
- Multi printing media: to satisfy MPS customers' demand for labels, envelopes, etc. printing.

IDC MarketScope: Worldwide Security Solutions and Services Hardcopy 2017

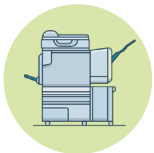

Why copiers are the perfect match for MPS?

After disassembling and analyzing the existing MFPs, we found that their consumption components are basically modular components: toner module (toner kit), developing module (developing unit), exposure imaging module (drum unit), waste toner bin module, fusing module (fusing unit), and other parts.

The reason why design the MFPs in such a modular way is to obtain a higher profit margin from MPS business. The main advantages are as follows:

- The extension of the lifetime of a single module reduces the maintenance/ replacement cycle, frequency and service cost.
- Increasing the difficulty of developing compatible consumables. Compatibility is a technical problem that every compatible vendors must face and alert at all times
- Reduce pollution, save energy and reduce consumption. Achieve maximum value output with the least amount of materials;
- It is because of above advantages that the copiers are perfect match for nowadays MPS market.
- Modular design is good for maintenance. If any malfunction occur, just directly replace the defective parts without affecting other parts
- The lifetime of a single module is made as long as possible to share the cost of cost per page.

2. Ninestar has comprehensive MPS solutions covering MPS software, hardware and MPS consumables.

- **Software**
With the launch of Ninestar Device Manage Software (NDMS), Ninestar meets the needs of its partners who wish to manage their customers installed base.
- **Printing consumables**
If you already have suitable MPS software, Ninestar provides full range of high quality printing products to meet your customers' different needs.
- **Software + printing consumables**
NDMS plus Ninesar's full range of printing products are the best combination for you and your customers to start MPS business.
- **Software + printing consumables + printer**
In addition to NDMS and Ninestar's one-stop printing products, Ninestar has the ability to offer Pantum or Lexmark branded printing device for your customers.

Ninestar solutions for copiers products

1. Ninestar is confident to offer patented solutions for copiers with strong R&D team and leading patented technology.

PENDING

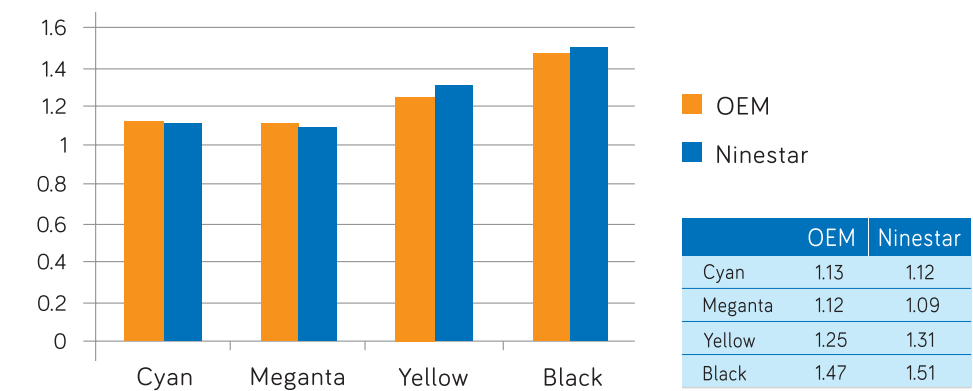

TOTAL 4,940 PATENT

3. All Ninestar products will be tested under a simulated MPS environment to ensure the function.

Premium and stable quality.

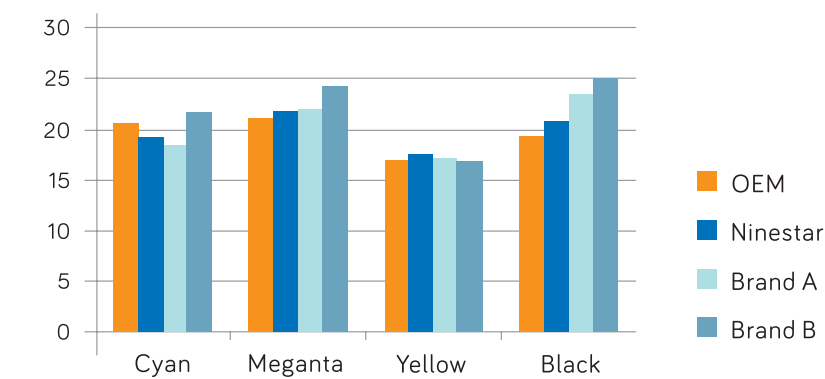

1. Image density: Ninestar's products are very close to OEM.

2. Toner consumption per page:

For users, the lower the toner consumption per page, the higher page yield.

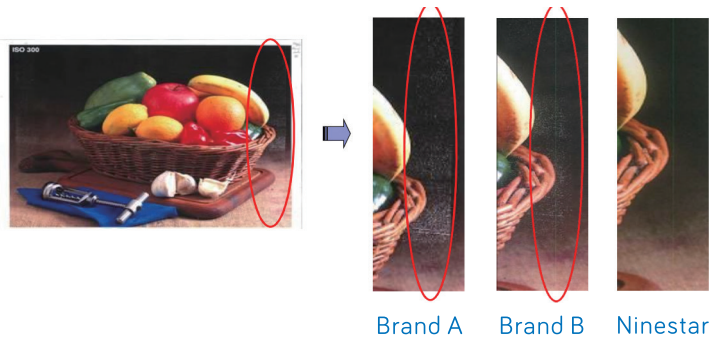

Compared with other brands, Ninestar's products are closest to OEM.

	Cyan	Meganta	Yellow	Black
OEM	20.5	21.1	17	19.5
Ninestar	19.2	21.7	17.5	20.7
Brand A	18.5	22	17.2	23.4
Brand B	21.8	24.2	16.8	25.2

3. Fixing fastness:

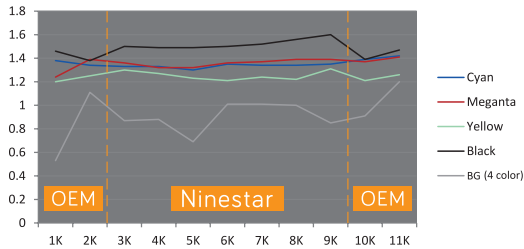

Compared with other brands, Ninestar has a better performance on fixing fastness.

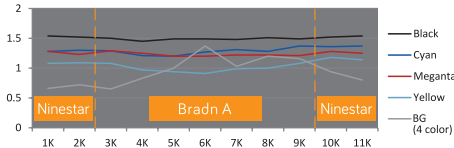

4. Toner compatibility testing:

Unlike printers, the former toner and the latter toner in copiers will usually be mixed up when you replace a new toner for copiers. This is because copiers consumables are usually made of toner bottles and photoreceptive/developing components while printers consumables are all-in-one toner cartridges. For copier users, printing problems such as back grounding and fusing may occur or even damage machines if two toner are not compatible. So toner compatibility testing is a must. From the diagrams below we can see Ninestar toner has an outstanding toner compatibility with OEM and other brands.

Ninestar solutions for use in Kyocera machines

As we have seen Kyocera's market potential, Ninestar has invested huge resources in developing replacement consumables for Kyocera product line. Ninestar's advantages are as below:

- >> Ninestar offers replacement consumables for the whole line of Kyocera products.
- >> Ninestar adopts imported quality toner for our products.
- >> Ninestar's brother company-Apex offers quick and responsible chip support.
- >> Ninestar provides customers with specific compatibility tests to ensure that our products are compatible with OEM products and will not do harm to customers' machines.
- >> Ninestar provides customers with specific compatibility tests to ensure that our products are compatible with customers' last purchased products.

Ninestar solutions for use in OKI machines

In 2015-2016, OKI launched its next-generation upgraded product line by using encrypted chip technology. Ninestar has launched the most competitive products for OKI copiers based on the Apex advanced chip technology.

SAMSUNG
Printing

After acquiring Samsung in 2016, HP developed a series of A3 copiers based on Samsung's A3 digital multifunction machine technology to make up for HP's shortcomings in the copier product line. This kind of the machine is mainly for the MPS business. It is believed it is also HP's future direction.
